

Thermo Scientific TSX Universal ULT Freezer, -86C, 600 Box Capacity, 100-230V 50/60 Hz

TSX Universal—Over 80 years of innovation packed into the next-gen ultra-low freezer. Recognizing the impact of your work, we prioritize sample security and reliability, and our legacy of crafting state-of-the-art lab equipment means our focus remains on user-centric design. The TSX Universal heralds a new era in performance with Universal V-Drive technology, delivering tighter control and faster recovery times. Coupled with an expanded setpoint range, universal voltage, whisper-quiet operation, simplified software updates and much more, TSX Universal seamlessly adapts to your workflow. Redefining sustainability, it is ENERGY STAR[†] certified with a 32% efficiency improvement, ACT[†] labeled, and is produced in our Zero-Waste to Landfill[†] certified facility. TSX Universal ULT—The pinnacle of reliability, sustainability, and innovation.

Reliability at its core:

- Manufactured excellence: built to the highest standards at our ISO 13485:2016 facilities
- Proven durability: 10k+ hours of intensive lab and field runtime testing to help ensure long-term reliability
- Proven quality: each unit undergoes rigorous end-of-line testing for quality control
- Complete transparency: shipped with factory documentation and a certification of calibration*
- Peace of mind: backed by our 12-year warranty** for long-term confidence
