

Solaris 4000 I Large Incubated Benchtop Orbital Shaker with 18"x18" platform

Thermo Scientific Solaris Incubated and Refrigerated Benchtop Shakers combine an ergonomic design with key feature enhancements like Peltier chillers, a sealed electronic system, programmable display, and an easy to clean platform design.

The triple eccentric drive mechanism, engineered to perform with a reduced noise level, is built with proven technology to support heavy loads, always maintaining consistent performance. The belt is maintenance-free and engineered to last the life of the shaker, and the shaker mechanism itself comes with an industry leading warranty.

- Create, download, and share up to 99 programs across multiple units for better efficiency and reproducibility in the lab
- Full color, touch screen display is easy-to-read, allowing for clear view of the speed, temperature, and run times from a distance
