

Supernuova 10x10 Stir 100-120V

- The new Thermo Scientific™ SuperNuova+™ series of stirrers provide reliable performance and safety, as well as easy operation. The units are available in two sizes, including a multi-position model with optimized controls and settings for applications that demand advanced precision.
- Intuitive design
- Ceramic or aluminium surfaces
- Easy-to-read LED display for heating and stirring
- Raised screen design protects electronics from spills
- Ability to configure programs (ramp/dwell) and save settings
- Optional PT1000 temperature probe and splash guard
- Advanced technology
- Stir-Trac is an innovative technology that offers low-speed stirring, uniform speed control, and stronger magnetic coupling
- Hot Top warning system designed to protect against accidental burns clearly indicating when the heating surface exceeds 50°C (122°F)
